- Different methods to add CHR in NAS
- Connections
- Usage
- Q & A

CHR in a nutshell

Cloud Hosted Router (CHR) - RouterOS version intended for running as a virtual machine. It supports the x86 64-bit architecture and can be used on most of the popular hypervisors such as VMWare, Hyper-V, VirtualBox, KVM and others. CHR has full RouterOS features enabled by default but has a different licensing model than other RouterOS versions.

Licencing model for CHR:

License	Speed limit	Price
Free	1Mbit	FREE
P1	1Gbit	\$45
P10	10Gbit	\$95
P-Unlimited	Unlimited	\$250

Free – Speed limited to 1Mbit

P1 – Limited to 1Gbit upload per interface

All the rest of the features provided by CHR are available without restrictions.

P10 – Limited to 10Gbit upload per interface

P-Unlimited – Unlimited

Disk Images

RAW disk image (.img file) (import method)

VMWare disk image (.vmdk file)

Hyper-V disk image (.vhdx file)

VirtualBox disk image (.vdi file)

Installation of CHR in NAS

Demonstration

Methods to add CHR:

Creating CHR

Import a virtual machine [X]

Select Storage
Select the storage where the virtual machine will be stored.

List All Storage

Host	Name	Status	Available stor...	RAID Type	Note
diskstation	diskstation - ...	Healthy	1.46 TB	Basic (Witho...	

Back

Import a virtual machine [X]

Configure General Specifications
Specify the number of CPU cores, memory, display card and storage location for your virtual machine instance.

Name: MikroTik_RouterOS_CHR

CPU(s): 1 [Settings]

Memory: 128 MB

Video Card: vmvga

Description: (optional)

Next Cancel

Import a virtual machine [X]

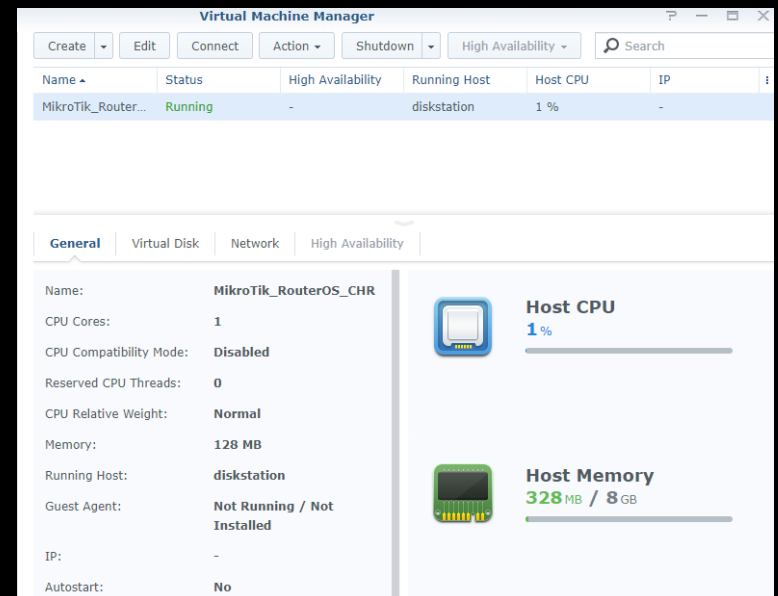

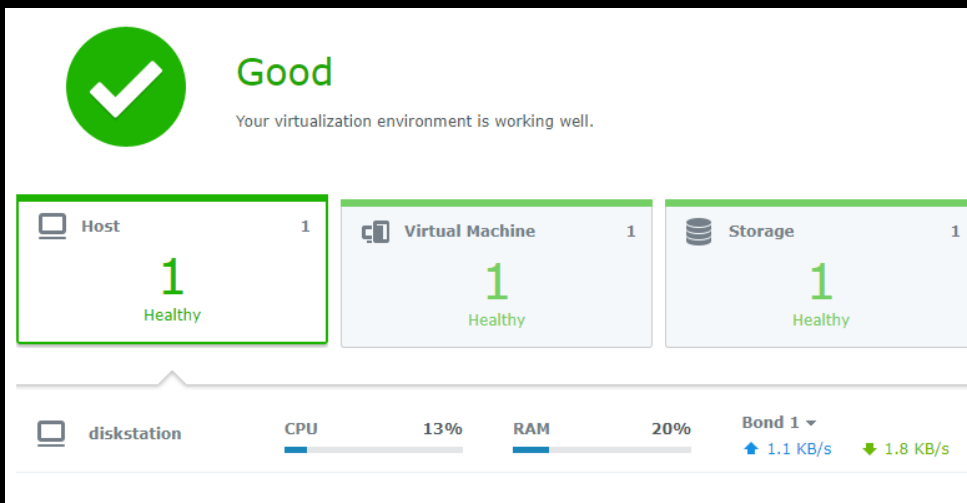

Storage
Specify the system image or ISO files, and the virtual disk configuration for your virtual machine.

ISO file for bootup: Unmounted [Browse]

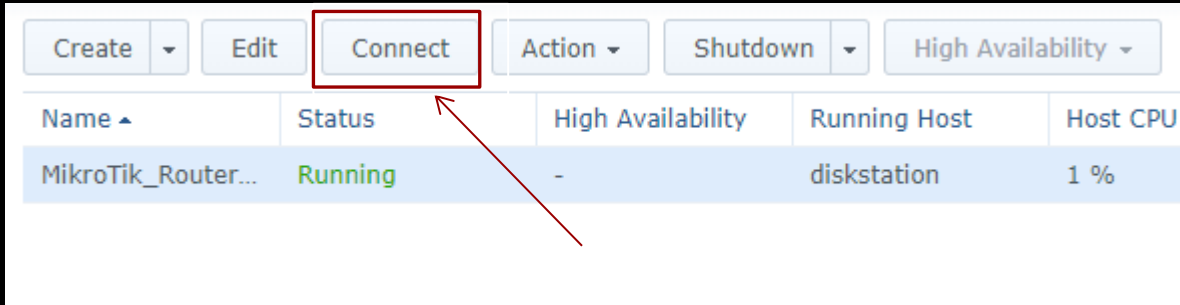

Additional ISO file: Unmounted [Browse]

Virtual Disk: 10 GB [Settings]

Completion

Connection

The screenshot shows the Mikrotik WinBox interface. At the top, there are several buttons: 'Create', 'Edit', 'Connect', 'Action', 'Shutdown', and 'High Availability'. The 'Connect' button is highlighted with a red box, and a red arrow points from it to the 'Status' column of the table below. The table has five columns: 'Name', 'Status', 'High Availability', 'Running Host', and 'Host CPU'. There is one row of data for a MikroTik router.

Name ▾	Status	High Availability	Running Host	Host CPU
MikroTik_Router...	Running	-	diskstation	1 %

      board-name: CHR
      platform: MikroTik
```

Usage

- Router with NAS storage and application functions
 - NAS functions:
 - Mail/video/storage/HA
- NAS with multiple routers setup via VM
- For conducting MikroTik Training lessons

Q & A

Thank you
